The accuracy, speed and broad menu of tests available for the Cholestech LDX make it an invaluable tool in the fight against heart disease, diabetes and metabolic syndrome. Best of all, the rapid results allow for immediate testing, counseling and treatment decisions.

Lipid Profile & Lipid Profile•GLU

Panel tests for total cholesterol (TC), HDL & non-HDL cholesterol, LDL cholesterol, and triglycerides with or without glucose (GLU) used by healthcare professionals for cardiovascular risk assessment and patient management. Abbreviated versions of these panels are available for use in health promotion environments (TC•HDL•GLU, TC•HDL, TC•GLU, & TC).

ALT•AST

A liver enzyme panel to support safety monitoring of numerous drug classes used in managing cardiovascular, diabetes, and other diseases.

hs-CRP

C-reactive protein (CRP) is sensitive, though nonspecific, marker of systemic inflammation. High sensitivity (hs-) CRP is optimized to detect "low grade inflammation".
